THE AUTOMOTIVE SUMMIT - SLD2019

NAVIGATE THE FUTURE

Our traditional business model is a thing of the past. Gone are the times when new models and techniques are driven by advances in engineering. Today it's the customer, end user and environment who set the agenda for development and the automotive industry must learn to adapt.

SLD "Navigate the future" takes a broader look on mobility and what will drive the automotive industry forwards. To give participants inspiration and guidance in how to steer towards the future.

Welcome to interesting and important day, October 17th in Gothenburg!

SPEAKERS

Jan Carlsson
