

A key differentiator for bottom-line results

Purchasing cost reduction ranks high on your customers' agenda. For you to meet their increasingly challenging cost and productivity demands, access to raw material cost development information is a pre-requisite.

Our quarterly raw material report provides the information you need in a well-structured format. The Triathlon/ISEA team of raw material experts consolidates **raw material price data and forecasts** from a large number of well-known forecasting institutes and organizations. The result is a fact-based and transparent instrument for actual price and forecasted price, based on some of the **world's most respected forecasting institutions**.

Access to raw material cost development allows you to:

- Formulate fact-based arguments to use in customer dialogues
- Consider component cost development in product strategy
- React early to raw material price fluctuations within purchasing

Raw material watch content:

-  Macro-economic trends
-  Metals
-  Plastics & Rubber
-  Currencies
-  Energy
-  World Oil

The Raw material network

In addition to the Raw Material Watch, Triathlon and ISEA organize a network, where the subscribing companies meet four times per year to network and share insights. Twice a year subject matter experts are invited to speak. We call it the Raw Material Summit.

FKG member's special offers

SILVER

4 issues

of the Raw Material Watch,
released in Jan, Apr, Aug and Nov.

15 000 SEK
